Air Disc Brake Piston Style Spring Brake Chamber

Function:

1. This range of Spring Brakes is used on axles fitted with air disc brakes to provide the service and parking brake functions
2. The internal wind-off mechanism allows the parking brake force to be removed if air pressure is no longer present.
3. The Spring Brakes have a mounting seal integrated in the non-pressure housing which prevents the entry of dirt or water into the caliper.

Swing-Away Gladhands

- Provides the lowest projection height from "trailer skin".
- Eliminates the need to "twist" hoses to obtain gladhand retraction.
- 180° swivel designed elbow permits optional air line entry from either the bottom or back port.
- Eliminates expensive swivel type hoses and permits the use of inexpensive nylon reinforced tubing.
- Gladhand bracket prevents foreign particles and insects from entering air lines while trailer is not in use.
- Bottom Port - 3/8"-18 NPTF
- Back Port - 3/8"-18 NPTF
